No part of this publication may be reproduced or transmitted in any form or by any means, electronic or mechanical, including photocopy, recording, or any information storage and retrieval system, without permission in writing from the copyright owner.

The appearance of the code at the bottom of the first page of an article in this journal indicates the copyright owner's consent that copies of the article may be made for personal or internal use, or for the personal or internal use of specific clients. This consent is given on the condition, however, that the copier pay the stated per copy fee through the Copyright Clearance Center, Inc. (27 Congress Street, Salem, Massachusetts 01970), for copying beyond that permitted by Sections 107 or 108 of the U. S. Copyright Law. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale. Copy fees for pre-1992 articles are as shown on the article title pages; if no fee code appears on the title page, the copy fee is the same as for current articles.

MADE IN THE UNITED STATES OF AMERICA

This journal is printed on acid-free paper.

CONTENTS OF VOLUME 296

Number 1, July 1992

COMMUNICATIONS

- Nucleotide-Protectable Labeling of Sulfhydryl Groups in Subunit I of the ATPase from *Halobacterium saccharovorum*
Michael Sulzner, Helga Stan-Lotter, and Lawrence I. Hochstein 347
- Enhancement of γ -Glutamylcysteine Synthetase mRNA in Rat Kidney by Methyl Mercury
James S. Woods, Holly A. Davis, and Robert P. Baer 350

BIOLOGICAL OXIDATIONS, BIOENERGETICS, AND P450 REACTIONS

- Structural Features of the 66-kDa Subunit of the Energy-Transducing NADH-Ubiquinone Oxidoreductase (NDH-1) of *Paracoccus denitrificans*
Xuemin Xu, Akemi Matsuno-Yagi, and Takao Yagi 40
- Characterization of a Rabbit Gene Encoding a Clofibrate-Inducible Fatty Acid ω -Hydroxylase: CYP4A6
A. Scott Muerhoff, Keith J. Griffin, and Eric F. Johnson 66
- Role of Oxygen in Oxidation of Lipid and Protein during Ischemia/Reperfusion in Isolated Perfused Rat Lung
Iraimoudi S. Ayene, Chandra Dodia, and Aron B. Fisher 183
- Myeloperoxidase-Catalyzed Iodination and Coupling
Alvin Taurog and Martha L. Dorris 239
- Effects of Testosterone and Estrogen on Hepatic Levels of Cytochromes P450 2C7 and P450 2C11 in the Rat
Stelvio Bandiera and Caroline Dworschak 286
- Purification and Characterization of a Catalase-Peroxidase from the Fungus *Septoria tritici*
Edna Levy, Zahir Eyal, and Ayala Hochman 321
- Glutathione Oxidase Activity of Selenocystamine: A Mechanistic Study
Jean Chaudiere, Olivier Courtin, and Jacques Leclaire 328
- Exogenous Quinones Directly Inhibit the Respiratory NADH Dehydrogenase in *Escherichia coli*
James Imlay and Irwin Fridovich 337

ENZYME STRUCTURE, MECHANISMS, AND REGULATION; CELLULAR REGULATION

- Purification and Characterization of Prostaglandin F Synthase from Bovine Liver
Lan-Ying Chen, Kikuko Watanabe, and Osamu Hayaishi 17
- Horseradish Peroxidase-Catalyzed Aerobic Oxidation and Peroxidation of Indole-3-Acetic Acid. I. Optical Spectra
Diana Metodiewa, Mariza Pires de Melo, Jorge A. Escobar, Giuseppe Cilento, and H. Brian Dunford 27
- Horseradish Peroxidase-Catalyzed Aerobic Oxidation of Indole-3-Acetic Acid. II. Oxygen Uptake and Chemiexcitation
Mariza Pires de Melo, Jorge A. Escobar, Diana Metodiewa, H. Brian Dunford, and Giuseppe Cilento 34
- Characteristics of NADPH-Dependent Thymidylate Synthetase Purified from *Streptomyces aureofaciens*
Marta Gálová, Dana Koptidesová, Daniela Rusznáková, Peter Račay, and Marta Kollárová 81
- The Reaction of *Aspergillus niger* Catalase with Methyl Hydroperoxide
Kyoko Kikuchi, Yasuko Kawamura-Konishi, and Haruo Suzuki 88
- The Pyruvate Dehydrogenase Complex from the Parasitic Nematode *Ascaris suum*: Novel Subunit Composition and Domain Structure of the Dihydrolipoyl Transacetylase Component
Richard Komuniecki, Robert Rhee, Deepashree Bhat, Emilio Duran, Emil Sidawy, and Hebok Song 115
- Cloning, Expression, and Nucleotide Sequence of *glgC* Gene from an Allosteric Mutant of *Escherichia coli* B
Paritosh Ghosh, Christopher Meyer, Elaine Remy, Doug Peterson, and Jack Preiss 122
- Investigation of the Substrate Binding and Catalytic Groups of the P-C Bond Cleaving Enzyme, Phosphonoacetaldehyde Hydrolase
David B. Olsen, Timothy W. Hepburn, Sheng-lian Lee, Brian M. Martin, Patrick S. Mariano, and Debra Dunaway-Mariano 144

- A Novel Human Phosphotransferase Highly Specific for Adenosine
Edward P. Garvey and Thomas A. Krenitsky 1611
- Insulin Mediator Stimulation of Pyruvate Dehydrogenase Phosphatases
Kevin Lilley, Chenggui Zhang, Carlos Villar-Palasi, Joseph Larner, and Laura Huang 1701
- Influence of Fructose 2,6-Bisphosphate and MgATP on Rat Liver Phosphofructokinase at pH 7: Evidence for a Complex Interdependence
Gregory D. Reinhart and Sharon B. Hartleip 2241
- Theoretical Study of Oxyhemocyanin Active Site: A Possible Insight on the First Step of Phenol Oxidation by Tyrosinase
O. Eisenstein, C. Giessner-Prettre, J. Maddaluno, D. Stussi, and J. Weber 2471
- Characterization of Ribonuclease P Isolated from Rat Liver Cytosol
Gudikote P. Jayanthi and Glenn C. Van Tuyle 2641
- Requirement of Protein Association with Membranes for Phosphorylation by Protein Kinase C
Keisuke Edashige, Toshihiko Utsumi, Eisuke F. Sato, Akio Ide, Magosaburo Kasai, and Kozo Utsumi 2961
- Purification and Characterization of Dimethylallyl Tryptophan Synthase from *Claviceps purpurea*
John C. Gebler and C. Dale Poulter 3081

GLYCOCONJUGATES; PROTEOGLYCANS AND EXTRACELLULAR MATRICES

- Incorporation of the Hexose Analogue 2-Deoxy-D-Galactose into Membrane Glycoproteins in HepG2 Cells
Christoph C. Geilen, Christoph Kannicht, Bruno Orthen, Claudia Heidrich, Christine Paul, Detlef Grunow, Rolf Nuck, and Werner Reutter 1081
- cDNA Clone to Chick Corneal Chondroitin/Dermatan Sulfate Proteoglycan Reveals Identity to Decorin
Weishi Li, Jean-Paul Vergnes, Pamela K. Cornuet, and John R. Hassell 1901

LIPIDS AND LIPID MEDIATORS

- Thermodynamic Elucidation of Solute-Induced Lipid Interdigitation Phase: Lipid Interactions with Hydrophobic versus Amphipathic Species
Laurence G. Roth and Chang-Hwei Chen 2071
- α -Oxidation of 3-Methyl-Substituted Fatty Acids in Rat Liver
Shewen Huang, Paul P. Van Veldhoven, Filip Vanhoutte, Guido Parmentier, Hendrik J. Eyssen, and Guy P. Mannaerts 2141

MEMBRANE PROTEINS, TRANSPORT, AND CELL SIGNALING; CYTOKINES AND RECEPTORS

- Heavy Chain Binding Protein (BiP/GRP78) and Endoplasmic Reticulum Are Exported from the Endoplasmic Reticulum in Rat Exocrine Pancreatic Cells, Similar to Protein Disulfide-Isomerase
Hiroto Takemoto, Tamotsu Yoshimori, Akitsugu Yamamoto, Yoshihiko Miyata, Ichiro Yahara, Kyoichi Inoue, and Yutaka Tashiro 1291
- Binding of Human Tumor Necrosis Factor α to Multimeric Complementary Peptides
Giorgio Fassina, Giovanni Cassani, and Angelo Corti 1371
- Identification of Prolactin Receptors in Hepatic Nuclei
Arthur R. Buckley, David W. Montgomery, Mary J. C. Hendrix, Charles F. Zukoski, and Charles W. Putnam 1981
- Effect of Aging on the Kinetic Characteristics of the Insulin Receptor Autophosphorylation in Rat Adipocytes
Pilar Ruiz, Juan A. Pulido, Carmen Martínez, José M. Carrascosa, Jorgina Satrustegui, and Antonio Andrés 2311
- Appearance of Thymosin α_1 in Supernatants of Monocytes Incubated with Prothymosin α
Stathis Frilingos, Konstantin Seferiadis, Marilena Papanastasiou, Constantin N. Baxevanis, Maria Frangou-Lazaridis, Michael Economou, Michail Papamichail, and Orestes Tsolas 2561
- Processing of the Intermediate Form of the Iron-Sulfur Protein of the BC₁ Complex to the Mature Form after Import into Yeast Mitochondria
R. S. Ramabadran and Diana S. Beattie 2791
- Dexamethasone Up-Regulates Mannose Receptor Activity by Increasing mRNA Levels
Hanson B. Cowan, Sherell Vick, Jon T. Conary, and Virginia L. Shepherd 3141

PLANT BIOCHEMISTRY AND MOLECULAR BIOLOGY

- Characterization and Mechanism of (4S)-Limonene Synthase, A Monoterpene Cyclase from the Glandular Trichomes of Peppermint (*Mentha × piperita*)
Jean I. M. Rajaonarivony, Jonathan Gershenzon, and Rodney Croteau 49
- Reversible Light/Dark Modulation of Spinach Leaf Nitrate Reductase Activity Involves Protein Phosphorylation
Joan L. Huber, Steven C. Huber, Wilbur H. Campbell, and Margaret G. Redinbaugh 58
- Ca²⁺-Dependent Protein Kinase from the Halotolerant Green Alga *Dunaliella tertiolecta*: Partial Purification and Ca²⁺-Dependent Association of the Enzyme to the Microsomes
Takashi Yuasa and Shoshi Muto 175

PROTEIN STRUCTURE AND FUNCTION; PROTEASES, PROTEIN TURNOVER, AND POST-TRANSLATIONAL PROCESSING

- A Study of Core Domains, and the Core Domain-Domain Interaction of Cytochrome c Fragment Complex
Alice Fisher and Hiroshi Taniuchi 1
- Spin-Labeling Studies of Rat Liver NADPH-Cytochrome P450 Reductase: Conformation and Function Relationship
Shashi P. Singh and Lawrence H. Piette 73
- The Slow-Refolding Step of Phosphoglycerate Kinase as Monitored by Pulse Proteolysis
Jean-Michel Betton, Dominique Missiakas, and Jeannine M. Yon 95
- Rationalization of the Effects of Compatible Solutes on Protein Stability in Terms of Thermodynamic Nonideality
Catherine L. Winzor, Donald J. Winzor, Leslie G. Paleg, Graham P. Jones, and B. P. Naidu 102
- Subtilisin Cleavage of Tubulin Heterodimers and Polymers
Sharon Lobert and John J. Correia 152
- Regulation of Protein Degradation in Normal and Transformed Human Bronchial Epithelial Cells in Culture
Hsiang-Kuang Lee, Raymond T. Jones, Roy A. M. Myers, and Louis Marzella 271

TRANSCRIPTIONAL CONTROL; MEMBRANE-NUCLEUS SIGNAL TRANSDUCTION; PROTEIN-DNA INTERACTION

- Rat Lung Polychlorinated Biphenyl-Binding Protein: Effect of Glucocorticoids on the Expression of the Clara Cell-Specific Protein during Fetal Development
Magnus Nord, Olof Andersson, Mikael Brönnegård, and Johan Lund 302

ERRATUM

- Volume 288, Number 1 (1991): V. Radjendirane, Manzoor A. Bhat, and C. S. Vaidyanathan, "Affinity Purification and Characterization of 2,4-Dichlorophenol Hydroxylase from *Pseudomonas cepacia*," pp. 169-176 354

Number 2, August 1, 1992

COMMUNICATION

- Inhibition of Human Serine Proteases by Substituted 2-Azetidinones
Wilson B. Knight, Renee Chabin, and Barbara Green 704

BIOLOGICAL OXIDATIONS, BIOENERGETICS, AND P450 REACTIONS

- Antiradical Effects in L-Propionyl Carnitine Protection of the Heart against Ischemia-Reperfusion Injury: The Possible Role of Iron Chelation
A. Z. Reznick, V. E. Kagan, R. Ramsey, M. Tsuchiya, S. Khwaja, E. A. Serbinova, and L. Packer 394
- Catalysis of the Oxidation of Steroid and Stilbene Estrogens to Estrogen Quinone Metabolites by the β -Naphthoflavone-Inducible Cytochrome P450 IA Family
Deodutta Roy, Anne Bernhardt, Henry W. Strobel, and Joachim G. Liehr 450

- Toxicity of 1-Methyl-4-phenylpyridinium Derivatives in *Escherichia coli*
Atsushi Mitsumoto, Tetsuo Nagano, and Masaaki Hirobe 482
- The Hydroxylation of Tryptophan
Z. Maskos, J. D. Rush, and W. H. Koppenol 514
- The Hydroxylation of Phenylalanine and Tyrosine: A Comparison with Salicylate and Tryptophan
Z. Maskos, J. D. Rush, and W. H. Koppenol 521
- Topical Tocopherol Acetate Reduces Post-UVB, Sunburn-Associated Erythema, Edema, and Skin Sensitivity in Hairless Mice
John R. Trevithick, Hua Xiong, Shirley Lee, David T. Shum, S. Ernest Sanford, Stephen J. Karlik, Christopher Norley, and Geoffrey R. Dilworth 575
- Lipid Peroxidation, Antioxidant Concentrations, and Fatty Acid Contents of Muscle Tissue from Malignant Hyperthermia-Susceptible Swine
Garry G. Duthie, Klaus W. J. Wahle, C. Ian Harris, John R. Arthur, and Philip C. Morrice 592
- Production and Characterization of Recombinant Lignin Peroxidase Isozyme H2 from *Phanerochaete chrysosporium* Using Recombinant Baculovirus
Todd M. Johnson, Elizabeth A. Pease, Joseph K.-K. Li, and Ming Tien 660
- Epitope Mapping of Monoclonal Antibodies to the *Escherichia coli* F₁ ATPase α Subunit in Relation to Activity Effects and Location in the Enzyme Complex Based on Cryoelectron Microscopy
R. Aggeler, R. A. Capaldi, S. Dunn, and E. P. Gogol 685

BIOPHYSICAL CHEMISTRY AND X-RAY CRYSTALLOGRAPHY

- The Binding of Estrogen and Estrogen Antagonists to the Estrogen Receptor
Jeffrey P. Bond, Shlomo Sasson, and Angelo C. Notides 583
- When Are Metal Ion-Dependent Hydroxyl and Alkoxy Radical Adducts of 5,5-Dimethyl-1-pyrroline N-Oxide Artifacts?
Phillip M. Hanna, Walee Chamulitrat, and Ronald P. Mason 640

ENZYME STRUCTURE, MECHANISMS, AND REGULATION; CELLULAR REGULATION

- Thrombin-Activated and Factor Xa-Activated Human Factor VIII: Differences in Cofactor Activity and Decay Rate
Pierre F. Neuenschwander and Jolyon Jesty 426
- Kinetic Mechanism of the Cytosolic Malic Enzyme from Human Breast Cancer Cell Line
Gu-Gang Chang, Ter-Mei Huang, Jehng-Kang Wang, Hwei-Jen Lee, Wei-Yuan Chou, and Ching-Liang Meng 468
- Indole Protects Tryptophan Indole-lyase, but Not Tryptophan Synthase, from Inactivation by Trifluoroalanine
Robert S. Phillips and Rajesh K. Dua 489
- Additional Binding Sites for the Pyruvate Dehydrogenase Kinase but Not for Protein X in the Assembled Core of the Mammalian Pyruvate Dehydrogenase Complex: Binding Region for the Kinase
Lin Li, Gary A. Radke, Kazuo Ono, and Thomas E. Roche 497
- Activation of Rat Liver Microsomal Glutathione S-Transferase by Hydrogen Peroxide: Role for Protein-Dimer Formation
Yoko Aniya and M. W. Anders 611
- Interaction of Rabbit Muscle Enolase and 3-Phosphoglycerate Mutase Studied by ELISA and by Batch Gel Filtration
Karen B. Nazaryan, Fernando Climent, Susan Simonian, Péter Tompa, and József Batke 650
- A Possible *in Vivo* Mechanism of Intermediate Transfer by Glycolytic Enzyme Complexes: Steady State Fluorescence Anisotropy Analysis of an Enzyme Complex Formation
József Batke, Veronica Ana Benito, and Péter Tompa 654
- Coordinated Regulation of Cerebral Glycolytic and Oxidative Metabolism, Mediated by Mitochondrially Bound Hexokinase Dependent on Intramitochondrially Generated ATP
Hector BeltrandelRio and John E. Wilson 667

GLYCOCONJUGATES; PROTEOGLYCANS AND EXTRACELLULAR MATRICES

- Antigenic Properties of Keratan Sulfate: Influence of Antigen Structure, Monoclonal Antibodies, and Antibody Valency
Markus J. Seibel, William Macaulay, Richard Jelsma, Fatemeh Saed-Nejad, and Anthony Ratcliffe 410

- Ionic Modulation of the Effects of Heparin on Plasminogen Activation by Tissue Plasminogen Activator: The Effects of Ionic Strength, Divalent Cations, and Chloride
Timothy N. Young, Jay M. Edelberg, Sharon Stack, and Salvatore V. Pizzo 530
- Presence of an Essential Lysine Residue in a GDP-Fucose Protected Site of the $\alpha 1 \rightarrow 3$ Fucosyltransferase from Human Small Cell Lung Carcinoma NCI-H69 Cells
Eric H. Holmes 562
- Binding of *Saccharomyces cerevisiae* Extracellular Proteins to Glucane
Vladimir Mrša, Tatjana Ugarković, and Slobodan Barbarić 569
- Structural Analysis of Five New Monosialylated Oligosaccharides from Human Milk
Gunnar Grönberg, Peter Lipniunas, Torgny Lundgren, Frank Lindh, and Bo Nilsson 597

LIPIDS AND LIPID MEDIATORS

- Properties of Monoglycerol Acyltransferase in Rat Adipocytes
Subhash C. Jamdar and Wang Fang Cao 419
- 1,2-Diacylglycerol Does Not Mediate the Stimulatory Effect of Phorbol 12-Myristate 13-Acetate on Phosphatidylcholine Synthesis in NIH 3T3 Fibroblasts
Zoltan Kiss, Jyotiprakas Chattopadhyay, and Nandor Garamszegi 457
- Stimulation by Heme of Steryl Ester Synthase and Aerobic Sterol Exclusion in the Yeast *Saccharomyces cerevisiae*
George A. Keesler, Warren M. Casey, and Leo W. Parks 474
- Purification, Molecular Cloning, and Expression of Lipase from *Pseudomonas aeruginosa*
Mikiko Chihara-Siomi, Kazuhiro Yoshikawa, Noriko Oshima-Hirayama, Kazumi Yamamoto, Yukihiro Sogabe, Takuji Nakatani, Takaaki Nishioka, and Jun'ichi Oda 505
- Chlorohydrin Formation from Unsaturated Fatty Acids Reacted with Hypochlorous Acid
Christine C. Winterbourn, Jeroen J. M. van den Berg, Esther Roitman, and Frans A. Kuypers 547
- Evidence against the 1:2:2:1 Quartet DMPO Spectrum as the Radical Adduct of the Lipid Alkoxyl Radical
Walee Chamulitrat, Hideo Iwahashi, David J. Kelman, and Ronald P. Mason 645

MEMBRANE PROTEINS, TRANSPORT, AND CELL SIGNALING; CYTOKINES AND RECEPTORS

- Coupled Expression of Ca^{2+} Transport ATPase and a Dihydrofolate Reductase Selectable Marker in a Mammalian Cell System
Arif Hussain, David Lewis, Carlota Sumbilla, Li-Ching Lai, Peter W. Melera, and Giuseppe Inesi 539
- Evidence That Swainsonine Pretreatment of Rats Leads to the Formation of Autophagic Vacuoles and Endosomes with Decreased Capacity to Mature to, or Fuse with, Active Lysosomes
D. R. P. Tulsiani and O. Touster 556
- The Lysosomal Membrane Glycoprotein Lamp-1 Is Transported to Lysosomes by Two Alternative Pathways
Sven R. Carlsson and Minoru Fukuda 630
- ATP-Mg/ P_i Carrier Activity in Rat Liver Mitochondria
Michael T. Nosek and June R. Aprille 691

PLANT BIOCHEMISTRY AND MOLECULAR BIOLOGY

- Purification and Characterization of a Novel 12,000-Da Calcium Binding Protein from Smooth Muscle
Rajam S. Mani and Cyril M. Kay 442

PROTEIN STRUCTURE AND FUNCTION; PROTEASES, PROTEIN TURNOVER, AND POST-TRANSLATIONAL PROCESSING

- Formation of Intraprotamine Disulfides *in Vitro*
Rod Balhorn, Michele Corzett, and J. A. Mazrimas 384
- Esterase-1: Developmental Expression in the Mouse and Distribution of Related Proteins in Other Species
Susan S. Kadner, Joseph Katz, and Thomas H. Finlay 435
- Ethacrynic Acid Inhibition of Microtubule Assembly *in Vitro*
Shihua Xu, Sukla Roychowdhury, Felicia Gaskin, and David L. Epstein 462

Purification and Characterization of a Putative Proenkephalin Cleaving Enzyme	<i>Seung R. Paik and Randolph V. Lewis</i>	617
Characterization of a Full-Length, Active-Site Mutant of Diphtheria Toxin	<i>Donald O. O'Keefe</i>	678
Purification of Interleukin-1 β Converting Enzyme, the Protease That Cleaves the Interleukin-1 β Precursor	<i>Shirley R. Kronheim, Amy Mumma, Teresa Greenstreet, Paula J. Glackin, Kirk Van Ness, Carl J. March, and Roy A. Black</i>	698

TRANSCRIPTIONAL CONTROL; MEMBRANE-NUCLEUS SIGNAL TRANSDUCTION; PROTEIN-DNA INTERACTION

Hydroxylation of 5 α -Androstane-3 β ,17 β -diol by Rat Prostate Microsomes: Effects of Antibodies and Chemical Inhibitors of Cytochrome P450 Enzymes	<i>Brian Gemzik, Justin Green, and Andrew Parkinson</i>	355
Hydroxylation of 5 α -Androstane-3 β ,17 β -diol by Rat Prostate Microsomes: Potent Inhibition by Imidazole-Type Antimycotic Drugs and Lack of Inhibition by Steroid 5 α -Reductase Inhibitors	<i>Brian Gemzik and Andrew Parkinson</i>	366
Species Differences in 5 α -Androstane-3 β ,17 β -diol Hydroxylation by Rat, Monkey, and Human Prostate Microsomes	<i>Brian Gemzik, Sera Jacob, Scott Jennings, James Veltman, and Andrew Parkinson</i>	374
Tissue-Specific Binding of Testis Nuclear Proteins to a Sequence Element within the Promoter of the Testis-Specific Histone H1t Gene	<i>Sidney R. Grimes, Steven A. Wolfe, and Daniel A. Koppel</i>	402
ERRATUM		
Volume 294, Number 1 (1992): Kousuke Shimogawara and Shoshi Muto, "Purification of <i>Chlamydomonas</i> 28-kDa Ubiquitinated Protein and Its Identification as Ubiquitinated Histone H2B," pp. 193-199		709
AUTHOR INDEX FOR VOLUME 296		710

NOTICE

The Subject Index for Volume 296 will appear in the December 1992 issue as part of a cumulative index for the year 1992.

Archives of Biochemistry and Biophysics is an international journal dedicated to the dissemination of fundamental knowledge in all areas of biochemistry and biophysics. **Communications** and **regular manuscripts** that contain new and significant information of general interest to workers in these fields are welcome. Sufficient detail must be included to enable others to repeat the work.

Communications offer a means of early publication of work of such importance that rapid publication is warranted. They should not exceed 15 double-spaced typed manuscript pages in length (including text, bibliography, tables, and figures). To expedite review and processing of communications, authors should send them directly to an Executive Editor most closely associated with the subject category of the communication. Communications sent to the Editorial Offices of the journal (see below) will be assigned to an Executive Editor.

Accelerated status may be given to those manuscripts that are reviewed as outstanding and that require little or no revision. At submission, authors may request accelerated publication of their manuscript. To expedite publication of such articles, authors will not receive proofs.

Manuscripts should be written in clear, concise, and grammatical English and should be submitted in quadruplicate (one original and three photocopies), including four sets of original figures or good quality glossy prints, to:

Archives of Biochemistry and Biophysics
Editorial Office, Third Floor, 1250 Sixth Avenue
San Diego, California 92101

Failure to receive the required number of copies of the manuscript may delay review. All copies of halftone artwork *must* be glossy prints or originals; photocopies of halftones do not show sufficient detail to be used for the review process. *In the case of rejected manuscripts only one copy of the manuscript will be returned to the author.*

For nucleotide sequence data authors are encouraged to submit original nucleotide or amino acid sequence data to a databank such as GenBank or EMBL. A footnote that includes the accession number should be included on the title page. It is preferable that the sequence data be deposited either prior to submission or by the time of acceptance of the manuscript. However, a footnote can be added at the proof stage if the material is deposited after acceptance. For further information please contact the editorial office or GenBank or EMBL directly.

Policy regarding publication of experiments on unanesthetized animals conforms with the standards for use of laboratory

animals established by the Institute of Laboratory Animal Resources, U.S. National Academy of Sciences. Experiments in which curariform agents are used must be justified and details as to steps taken to reduce or avoid distress to the animal must be provided, particularly with regard to electrical stimulation.

Original papers only will be considered. ***Manuscripts are accepted for review with the understanding that the same work has not been published, that it is not under consideration for publication elsewhere, and that its submission for publication has been approved by all of the authors and by the institution where the work was carried out. It is the responsibility of the corresponding author to obtain the agreement of all the coauthors of the manuscript prior to its submission to the journal.*** Abstracts of oral or poster presentations are not considered to constitute previous publication. Presentation of material in preliminary communications normally will not preclude publication of a full paper in *Archives*, provided that the full paper contains additional information that justifies its publication and does not repeat the presentation of the same data that supported the preliminary communication. The manuscript should be accompanied by copies of all preliminary communications and of all relevant manuscripts that are in press or under editorial consideration by another journal. Authors must verify the wording of any cited personal communication with the persons who supplied the information and obtain approval for the use of their names in connection with the quoted information or for the citation of unpublished work; written evidence of such approval should accompany the manuscript. All material published in *Archives* represents the opinions of the authors and should not be construed to reflect the opinions of the Editors or the Publisher.

Authors should suggest competent reviewers in their field and may also suggest individuals whom they wish to have excluded from the review process. The corresponding author will receive a decision letter from the Executive Editor. Revised manuscripts and correspondence concerning such manuscripts should be sent to the Executive Editor at the address indicated on the decision letter. Revised manuscripts should be accompanied by a copy of the unrevised version.

Many acceptable papers require minor revision or condensation. It is in the mutual interest of both the authors and the journal that amended manuscripts be returned promptly. A revised paper will retain its original date of receipt only if it is received by the Executive Editor within 2 months of the date of return to the author.

Authors submitting a manuscript do so on the understanding that if it is accepted for publication, copyright in the article, including the right to reproduce the article in all forms and media, shall be assigned exclusively to the Publisher. The Publisher will not refuse any reasonable request by the author for permission to reproduce any of his or her contributions to the journal.

Form of manuscript. Manuscripts should be typewritten and double-spaced throughout on one side of 8.5 × 11-in. white

¹ An extended Instructions to Authors is published in the January issue of *Archives of Biochemistry and Biophysics*. Reprints are available from the Editorial Office upon request. Authors should consult the extended Instructions for details on nomenclature, IUPAC-IUB rules and recommendations, and accepted abbreviations.

paper, with 1-in. margins on all sides. All pages should be numbered consecutively.

Subject Areas. Authors should specify on page 1 of the manuscript the Subject Area of the article submitted:

Biological Oxidations, Bioenergetics, and P450 Reactions
Glycoconjugates; Proteoglycans and Extracellular Matrices
Lipids and Lipid Mediators

Biophysical Chemistry and X-Ray Crystallography

Membrane Proteins, Transport, and Cell Signaling; Cytokines and Receptors

Enzyme Structure, Mechanisms, and Regulation; Cellular Regulation

Plant Biochemistry and Molecular Biology

Protein Structure and Function; Proteases, Protein Turnover, and Post-Translational Processing

Transcriptional Control; Membrane-Nucleus Signal Transduction; Protein-DNA Interaction

Page 1 should contain the article title, author(s), affiliation(s), a short running title (abbreviated form of title) of less than 65 characters including letters and spaces, the appropriate subject category for listing in the Table of Contents, suggestions for index list entries, and the name, complete mailing address, and telephone and fax numbers of the person to whom correspondence should be sent.

Page 2 should contain a short abstract of 50–250 words.

Editorial style should conform to the *Handbook for Authors* (American Chemical Society).

Footnotes to the text should be identified by superscript Arabic numerals and should be typed double-spaced on a separate sheet; footnotes to tables should be identified by superscript lowercase italic letters (^a, ^b, etc.) and placed at the bottom of the table.

Tables should be numbered with Roman numerals and cited consecutively in the text. Each table should be titled and typed double-spaced on a separate sheet. Units must be clearly indicated for each of the entries in the table.

Authors can submit complex tables and mathematical material as camera-ready copy. In this way, they are spared multiple, tedious proofreadings and the chance of error is reduced. Tables submitted as camera-ready copy should be typed single-spaced whenever possible and preferably submitted as 5 × 7-in. glossy prints.

Figures should be cited consecutively in the text by Arabic numerals. Legends should be typed double-spaced on a separate sheet. All figures and illustrations are to be submitted in such form as to permit photographic reproduction without retouching or redrawing. They should be planned to fit the proportion of the printed page (7½ × 9 in.; column width, 3.5 in.) and submitted no larger than 8.5 × 11 in. Lettering on drawings should be of professional quality or generated by *high-resolution* computer graphics and should be large enough (10–12 points) to take a reduction of 50–60%. Drawings should be made with black India ink on tracing linen, smooth-surface white paper, or Bristol board. Alternatively, *high-quality* computer graphics may be acceptable. Graph paper, if used, should be ruled in blue. Glossy prints of figures properly prepared are acceptable. Illustrations in color can be accepted only if the authors defray the cost.

Cover photographs. Suggestions for *cover photographs* are welcome. Submit them as slides with 8½ × 11-inch color or

black-and-white prints to accompany specific articles. A short (one-line) legend should accompany each photograph.

References should be cited in the text by an Arabic numeral in parentheses and listed at the end of the paper in numerical order typed double-spaced on a separate sheet. Abbreviations of journal titles should conform to those of *Chemical Abstracts Service Source Index*, 1985. Please note the following examples.

1. Mottley, C., Robinson, R. E., and Mason, R. P. (1991) *Arch. Biochem. Biophys.* **289**, 153–160.
2. Stein, W. D. (1986) *Transport and Diffusion across Cell Membranes*, Academic Press, San Diego.
3. Magnani, J. L., Spitalnik, S. L., and Ginsburg, V. (1987) in *Methods in Enzymology* (Ginsburg, V., Ed.), Vol. 138, pp. 195–207, Academic Press, San Diego.

Miniprint supplements are an effective way of presenting supportive data. They are printed from plates made by photographic reduction from typed pages provided by the author. Types of data that have been published as miniprint supplements include analyses relevant to studies of amino acid or polynucleotide sequences, details of chemical syntheses, preparation of enzymes, extended statistical or mathematical discussions, and X-ray diffraction data. The miniprint supplement is published in the journal, immediately following the parent paper, and is included in the reprints. Since the miniprint supplement is produced from camera-ready copy supplied by the authors with no redaction or editorial changes it is important that the copy be letter perfect and conform to the style of the journal. *Authors will not be permitted to make changes to the miniprint supplement at the proof stage. Any changes necessary in the proof must be made as a typeset "Note added in proof."*

Proofs will be sent to the author, with a reprint order form. Authors will be charged for extensive alterations.

Reprints. Fifty reprints of each article will be provided free of charge. Additional reprints may be purchased.

Personal computer disks. Manuscripts may be submitted to *Archives of Biochemistry and Biophysics* on personal computer disks after the manuscript has been accepted and after all revisions have been incorporated onto the disk. Please supply the file as a straight ASCII file with generic codes specified by the publisher. Label the disk with the type of computer used, the type of software and the version number, and the disk format. All tabular and mathematical material will be typeset conventionally. Art must be prepared as camera-ready copy; see the section on Figures earlier in these Instructions for Authors.

A hard copy printout of the manuscript that exactly matches the disk file must be supplied. Academic Press will not accept disks without accompanying printouts of all files on the disk. File names must clearly indicate the content of each file. The manuscript will be edited according to the style of the journal, and the proofs must be read carefully by the author. Disks that are not translatable or economical to process will not be used. The publisher reserves the right not to use the disk.

For further information on preparing the disk for typesetting conversion and a list of generic codes, please contact the publisher (Editorial Supervisor, Journal Division, Academic Press, 1250 Sixth Avenue, San Diego, California 92101; telephone: 619 699-6415; fax: 619 699-6800).
